

DIAMOND OIL TANKS

Bunded Storage

**DIAMOND
TANKS**

What is a Diamond Tank

Diamond tanks are manufactured by Harlequin MFG and meet all regulatory requirements as well as being fully bunded. The Diamond range is best suited for those awkward installations, especially popular are the slimline options with our 1000 & NEW 1400 super slimline tanks.

What is a Bunded Oil Tank?

A 'Bunded' oil tank simply consists of a tank within a tank. Oil is stored in the inner tank and the outer tank acts as a failsafe so that in the event of a spillage, excess oil will collect in the outer tank - thus averting a pollution incident and costly environmental clean-up operation.

Bunded oil tanks have been proven to significantly reduce the risk of pollution at oil storage installations. They are a requirement at most commercial, industrial and institutional premises; all installations in the Channel Islands; and, at many domestic installations in the United Kingdom and Republic of Ireland.

Benefits of a Diamond Oil Tank:

- **Excellent Design** - specially designed for those awkward installations, the range boasts super slimline options along with handles for easy moving and heavy duty lids on all models.
- **Integrally Bunded** - designed to protect the surrounding environment, all tanks are bunded preventing pollution if the internal tank was ever to leak.
- **Non Corrosive** - manufactured from Medium Density Polyethylene (MDPE) your Harlequin tank will not corrode.
- **10 Year Guarantee** - peace of mind that should an issue arise with your tank, Harlequin will be there to help. *10 year guarantee upon registration with Harlequin.
- **Meets Regulations** - as well as being fully bunded, each tank meets all relevant regulatory requirements.
- **Contents Monitoring** - each model has a 32mm hole suitable for fitting an electronic gauge, also available as an optional extra.

**NEW
1400SSL**

Independently tested & approved to EN13341.

All Diamond Tanks are fully bunded.

ABOUT HARLEQUIN MFG

Being one of Europe's largest manufacturers of rotationally moulded plastic tanks, we've been at the forefront of product developments for over 35 years. From our base in Northern Ireland we design, manufacture and deliver our tanks all over the world.
